

```
document.addEventListener('DOMContentLoaded', () => {  
  
  const buttons = document.querySelectorAll('.button');  
  
  buttons.forEach(button => {  
  
    button.addEventListener('click', () => {  
  
      console.log('Button clicked:', button.textContent);  
  
      // Add functionality for each button here  
  
    });  
  
  });  
  
});
```
